

Building the Foundations of Tomorrow

Business Profile for Aracto Arabia
Construction Department

 **ARATCO**
AL ARABIA CO. LTD.

Building Since 2007

Preface

The Construction Division of ARATCO Al Arabia has executed large-scale Engineering, Procurement and Construction (EPC) projects across Saudi Arabia. We specialise in civil construction, as well as structural, mechanical and electrical works, complemented by in-house fabrication capabilities and a strong commitment to HSE practices. Whether it is a reinforced concrete structure or a complex shutdown, our projects are delivered with accuracy, precision and dependability, qualities that have earned the trust of leading industry players, including top architects, consultants and clients.

Building responsible infrastructure

About Us

ARATCO is a business group of global scale developing and building responsible infrastructure through the sectors of engineering & construction and urban development & management. ARATCO is recognised as one of the leading qualified contractors in K.S.A. Since 2007, with specialised experience in the construction industry, the company has achieved its position at the core of the contracting business in the Kingdom over a short span of time with a highly skilled team of workers and professional managers. We have the distinction of being associated with most of the leading architects & consultants of the country.

Mission

To effectively position the company
to meet the construction needs of
infrastructure developments in line with
the changing economic landscape in
Saudi and abroad

Vision

To be recognised nationally and internationally
as a specialised construction organisation
comparable with the best in the field, covering
the entire spectrum of construction activities
and services in the infrastructure sector.

*Construction
is setting up
long-lasting
relationships
of trust,
reliability and
performance.
Just not a series
of bricks and
steel.*

Words from our Director

At Aratco Al Arabia we know that construction is more than a series of bricks and steel; it is the same as setting up long-lasting relationships of trust, reliability and performance. Our Construction Division has worked since 2007 on grand EPC projects with the three key elements – precision, quality, and safety – in mind. The successful operations in our business are attributed to the hard work of specialised teams, to our innovative solutions and to our commitment to satisfy the changing demands of our clients. As we look ahead and project growth in the future, we are determined to achieve excellence in every project and develop a long-lasting partnership that is well beyond the completion of construction.

Abdul Hameed Kanhirangadan
Director

We go beyond the expectations to ensure that we build reliable, sustainable and meaningful infrastructure. Not just a focus on satisfying clients.

Words from our Project Director

At Aratco Al Arabia, all the projects are handled with caution, close observation of safety, and efficiency. Whether it is turnkey industrial solutions or critical shutdown projects, our team ensures the job is completed on time, within budget, and without sacrificing quality. Our team consists of highly trained engineers, workforce and modern machinery so that every single project comes out perfect. We are not just focused on satisfying clients; we go beyond the expectations to ensure that we build reliable, sustainable and meaningful infrastructure.

Jemshad KT
Project Director

Departments

Project Management

End-to-end planning, coordination and delivery of large-scale EPC projects within the disciplines of cost, time and quality objectives.

Design & Engineering

Efficient custom civil, structural, mechanical and electrical designs that have exceptional quality that optimise construction efficiency

Sourcing Quality Materials

Procuring materials and equipment from trusted suppliers to make the project cost-effective and deliver it on time.

Site Execution

Skilled work crews with qualified and quality equipment, and working safety standards to provide an effective on-site involvement.

Health, Safety & Environment (HSE)

Zero-compromise standards and integrated safety culture summed up with continuous training and adherence to the international standards.

Quality Assurance/Control (QA/QC)

A rigorous programme of inspection, testing, and document recording assures durability, responsiveness, and client satisfaction.

Manpower & Equipment Management

Effective mobilisation of skilled labour force and approved equipment to massive project timelines.

Core Services

- **EPC (Engineering Procurement Construction)**
- **Plant Shutdown Services**
- **Civil Works**
- **Electrical Works**
- **Mechanical Works**
- **Structural Fabrication & Erection**
- **Architectural Works**
- **IT Solutions**

EPC (Engineering Procurement Construction)

We specialise in end-to-end implementation of industrial and infrastructure projects by integrating engineering, procurement, and construction solutions.

- Raising of reinforced concrete and steel buildings with precast and prestressed members.
- Site development, asphalt, road works, grading and drainage.
- Building of residential, industrial and commercial structures.
- Insulation, aluminium cladding, waterproofing, and interior/exterior works.
- Steel fabrication & erection – girders, beams, platforms, stairways and custom access systems.
- Advanced mechanical and electrical systems fitment of industrial plants.
- Safe operations using cost-effective, modern and certified equipment

Plant Shutdown Services

Our services provide safe and compliant shutdowns with efficiency in industrial plants that are operated with minimal downtime but with a high standard of operation.

- Sophisticated mobilisation of manpower in high-priority critical maintenance and turnaround projects.
- Careful planning of a shutdown process and optimisation of the working process.
- Installation process, testing, and commissioning industrial equipment, tanks, and pipelines.
- Installation of HVAC, firefighting, plumbing and utility water systems.
- Electrical works – substations, high/low voltage, power distribution, lighting, fire alarm systems, and road lighting.
- Adherence to the regulatory and safety requirements.

Civil Works

ARATCO has its focus on construction as the pillar of civil works. We undertake both concrete and steel construction, such as complicated precast and prestressed constructions. We have successfully carried out:

- Site Development
- Grading and Drainage
- Asphalt & Road Works
- Reinforced Concrete Structures
- Interior and Exterior Decoration Work
- Precast Concrete Structures
- Steel Structures
- Building and Equipment Foundations
- Electrical Substations
- Multi-Storeyed Parking Lots
- Chain-link and all types of fencing wall
- Underground Reservoirs and Elevated Tanks
- Power Transmission and Communication Towers
- Construction of Residential & Commercial Buildings
- Construction of Plants and Factories
- Aluminium Cladding, Waterproofing & Insulation
- Annual Maintenance
- Excavation & backfilling

Electrical Works (The Relevant Part of Construction)

ARATCO is experienced in the complete installation of full power systems in buildings and infrastructure such as substations, street lighting, and incorporated fire safety systems.

- Its services include electrical plant installation, relays, MV and LV metering, and even construction of substations.
- High/low voltage termination, cable pulling.
- Commercial installation of electrical wiring, power, lighting, UPS systems, power distribution and grounding.
- Installation of emergency and standby generators with switchgear interface emergency and standby generators.”
- Installation of fire alarm systems (traditional types and intelligent ones).
- Road lighting

Mechanical Works

Mechanical works in construction EPC encompass key elements of building and industrial projects, including HVAC, firefighting, plumbing & water utilities, as well as industrial & tanks and process pipeline installation.

- Installation, testing and commissioning of mechanical equipment, tanks, vessels, plant pipework and pipelines.
- Building of wastewater systems.
- AC ducting and installation of HVAC.
- Firefighting systems installation.
- Water supply, plumbing and drain systems installations, testing and commissioning.

Structural Fabrication & Erection

This division manufactures and installs steel structures for construction projects. It specialises in civil works, supporting plant construction and on-site assembly of custom steel components.

- Support girders and beams
- Catwalks & ladders
- Platforms & stairways
- Support risers & bases
- Custom access ways
- Screen guard frames
- Storage racks & systems

IT Solutions

ARTCO has been a trusted global IT partner. Blending intuition, technology, and business acumen, we deliver reliable, user-friendly solutions that enhance security, boost productivity, and keep businesses seamlessly connected.

- **CCTV Camera Solutions**
Ensure safety with advanced CCTV surveillance systems. ARTCO offers 24/7 coverage and security of your business and premises from installation to maintenance.
- **Door Access Control**
Safeguard your workplace with smart and secure door access control systems. Efficiently control and track entry points and improve the overall security.
- **Networking Solutions**
Stay connected with robust networking solutions designed for your business. ARTCO provides uninterrupted connectivity and performance, whether it is in structured cabling or overall network operation.

Architectural Works

At ARTCO, we believe architecture is not just about constructing buildings but about shaping experiences, identities, and spaces that stand the test of time. Having the profound knowledge of contemporary design trends and functionality,

We provide architectural solutions for residential, commercial, interiors, and renovations. Every project is guided by innovation, sustainability, and precise detailing — designed to be both visually striking and highly functional.

Our qualified team works closely with clients, blending creativity and technical expertise to bring visions to life. From luxury homes and commercial spaces to elegant interiors and full remodels, ARTCO delivers quality, accuracy, and timely execution.

With a reputation for trust and excellence, we continue to set new architectural standards and design spaces that transform lifestyles and create lasting impressions.

Aratco Serves

- Manpower Supply
- Camp & Catering Services
- Restaurant & Coffee Shop
- Equipment & Vehicle Hiring
- Commercial Building
- Transportation Facility

Recent Projects

- 21 numbers of tanks for chemical storage supply and construction of Riyadh MEF Project
- Landscaping for OTC Yanbu
- Misc. civil works at Jazan for Yamama Company
- Renovation of construction of petrol station for Sahel as per ARAMCO Standard
- Construction of hangers for gypsum company
- Construction of office work at Al Qassim
- Construction of camp at Al Qassim
- Ware house project at AMICTONO, Yanbu
- Construction of office and camp facility, Al Ghat
- IKEA Store - Khamis Mushait
- Fence work & walkway - Green Vision - Jazan
- NWC project at Madina
